

Neo-Mech G-2

Saturday, 24 November 2007

Last Updated Friday, 25 January 2008

This is the new Neo-Mech chassis I developed after having created and tested my previous Mech (Big-Red) as many called it.

I began the project back in early January of 2007.

The new chassis is 16ft tall thus far as I have not yet built the head.Â

I am going to be transferring all current hydraulics from Big-Red Due to a dry well of funding (lack of) to the new chassis. I have had some sponsor ship first fromÂ Theodore Agronat of <http://www.ceonex.com/> and most recently from Peter Kappes of <http://www.digitaldancers.com/> .

No video's are available as of yet.
